OFFICE NO. 51 CLARK STREET,

THE ELECTIONS YESTERDAY.

Our information from Missouri is too meages to warrant a conjecture as to the result. For some unaccountable reason we could obtain nothing last evening from St. Louis, whither all eyes are turned with great solicitude.

The returds from Kentucky indicate the election of Gen. Leslie Coombs. (Union candidate) to the office of Clerk of the Appeals.

Garibald's heroic efforts for Italian freedom, will be the means of adding a triffe to his military cash-box. The public opinien of this sountry must be greatly misunderstood in Europe if the efforts of the Chichio priesthood and laity to ry down the liberal cause have been accepted as an index of the popular wish. Let us hope that it will be set right, and that, in spite of Douglas, Slavery and Democracy, the oppressed of the Old World may learn that Liberty still has her worshippers in America.

The exclude excludent was created on Others and study, but success the city, on Saturday, by the announcement that Che. H. \*\*MOME COMPLANTS.\*\*

We are in receipt of two communications, each of which is signed "A Douglas Democrat," completing of the manner in which the fines and Herald is conducted, and demanding the publication in Chicago of a simon-pure Douglas paper. We do not print either of them, for the reason that they do not differ meterally from one that appeared in our columns on Saturday, and because the quarrels of the Democrats are matters in which we have no concern. Lincoln, unquestionably, has a clear majority of all the voters in the State, and it matters little whether the Sham Democracy quarrel or keep the peace.

N. P. Willis on Chicago.
N. P. Willis of the N. Y. Home Journal has

been making a three weeks' cruise out West. His last letter is from Chicago, which he is disposed of the growth of its population he falls into a great error. He says it has increased in ten year, which is fast enough to satisfy moderate people. He describes the Wigwam as a "tum-ble down structure," which is another blunder. It is the largest and most prominent structure

lt is the largest and most prominent structure ere built, in the Union, for the purposes of a single political campaign. We take a few extracts from his letter:

The first object of interest which caught, my vye, in a stroi sfire breakfast, was a heauliful church, built, apparently in architectural half-mourning. The material, that is in any, produced this impression—a light cray atone, which, with supersoin—a light cray atone, which, was the superance of a graceful drapery of mourning frings or lace. I can acare supiain to myself the look of veiled sadness which was thus given to a bouse of (60, but, as the supect of the place where penitence and sortow are oftenest the truest worshippers, it seemed to me priticularly appropriate.

A starting effect, at Chicago, for the traveller's eye, in the sudden crossing of the principal sirests by large vessels, and apparently with no large interruption to the moving tide of vehicles than would be made by the transverse pansing of a rail cur. The busiest quarter of the city is built around the windings of a deep creek; and, by means of a most ingenious set of persoloridge, the warchouses which are thus in the sente of the tows can bring in their ships, to make cargoosat the doner—the bridge oping pet of a broad thoroughfare one minute, in the sente of the tows can bring in their ships, to make cargoosat the doner—the bridge oping pet of a broad thoroughfare one minute, in the sente of the tows can bring in their ships, to make cargoosat the doner—the bridge oping pet of a broad thoroughfare one minute, in the sente of the town of the person of the water of the town of the water of the person of the water of the water, more of the water of the wate

Squatter Fixzle at Morris.

[Special Depaths to the Press and Tribuse.]

Means, Aug. 8, 1800.

The Squatter meeting held here to day was a slim affair. There were only 500 persons present, including women, children and Republicans. Considering the effort made to procure an impusing demenstration that would carry terror to the Republicans, the meeting was a complete failure. The speeches were as poor and trashy as the crowd was insignificant. The thing was a fixzle, and the poor, "don't-care" Squatters feel down in the mouth.

Mennes, Green Co., Wh., Aug. 4, 1800.

Editor Pressand Tribune:

I judge of the manner in which you speak of Blant and McKinney that you are laboring under a mistake with regard to them. Mr. Blunt, (William is his first name), lives in this county and was at my house last night. I have been personally acquainted with him seventeen years, and I would inform you that his a yro slavey mas, and has been in the habit of holding discussions on that swipter, always taking the ground that the Bible sanctions slavery.

The NORTH CANOLINA ELECTION.

The result of the election in North Carolina is now preity definitely ascertained, and shows a majority for Ellis, Demoirat, for Governor, of about 10,000. Pool has made considerable gains, chiefly because the Opposition vote has been more fully brought out than in former contests, and further, because he was running upon an issue popular in the middle and western sections of the State. Beath of Mrs. George C. Bates.
This estimable lady breathed her last yesterday, August 1st, at the hospitable residence of Rt. Rev. Slibop McCostry, in this city, after a lingering and painful illness which she endured with hence fortistudes Ellen Marion Kinsie, wife of George C. Bates, Eeq., was the daughter of John Kinnie, Enq., who late in the insticentury, emigrated to the United States from Scotland, and belonged to that numerous class of Scotch and Fraink insters, by whose enterprise the great for trade of the Northwestern Territory was opinied, and the foundation of its future greatness established. He engaged in the far trade first in Sandusky, Ohio, and subsequently embarked in business in Datroit, with Mr. Forsyth, father of the late Major Robert A. December, 1905, being the first white child born in that place. She was admented in Middletown, Count, and at the age of sixtem, married Dr. Alexander Woolcott. Several days before her death, Mr. Bates was taken enddenly and everely ill in the city of New York, and is still detained there, unable to leave the room. Her memory will ever be chardande by a large circle of triangle to whom the sadered herselt by the many strians which advanced her character.

The Chicago Silver Plating and Lamp works.

The Chicago Silver Plating and Lamp Works.

The establishment of L. A. Hambien & Co., for several years past located on Frankin street in this city, has despite the financial pressure, been making substantial and solid progress in its important and multifarious departments of manufacture.

Their Silver Plating has been of the finest description, their Lamp Works have been winning each year a wider prominence, especially in their leading, article of Lecomotive Headlights, which many of the railroad men prohounce the best manufactured in the country.

Hambien & Co.'s Locomotive Headlights are in use on nine of the principal rialroads running out of this city, and upon ten other prominent Western roads, their adoption yearly widening and extending until now a regular agent, Philip P. Justice, has been appointed for the sale of these celebrated Chicago male Headlights in Philadelphis, New York, and Boston. In the same category, and sharing like success come the Lantern smade by this firm, in every style and variety for railroad and other

But we set out to say that Messra. Hamblen & Co, have outgrown their former location, and we visited them yesterday in thair new quarters occupying the spacions double floors of the three upper stories of Brown & Wilder's Block, No. 47 and 49 State street. S. Lockwood Brown, Esq., of the last named firm, extensive dealers on the same premises, in Gas Fixtures and Pipe Fittings, is a partner in Hamblen & Co., and thus there is a bringing together of both establishments.

In their new locality, with extensive appliances and conveniences for their manufactures,

the removal will prove a happy and advanta-geous one. We passed a pleasant hour yester-day, looking through this great Sliver Plating establishment, where everything is ready, and now busied in turning out every description of Sliver Plated Ware. Central Railroad, to leave this city at 8 o'clock to night for the grand State Republican rally at Springfield, will probably be one of the most marked features of this eampaige; from present promise it will be the largest company that ever joined in a single excursion by rail in the Northwest.

It is especially desired that all who are intending to go, be promptly at the depot in ample season, as the train will leave promptly on time. This great turnout is reminding some of our older Republican residents of Whig proclivities of the campaign of 1840, the "Old Tippecance times" when an excursion for that day equally large with this of to-night, turned out three hundred strong and in wagons took up their march for the Capitol, camping out by the way at night. Taking the Census.

Editors Press and Tribene:
The census-takers, I suppose, consider their labors about concluded; but if all the city has labors about concluded; but if all the city has been taken as it was in my neighborhood, it will be a very defective return. There are about twenty young men boarding where I do. None of us can hear of the Deputy Marshal having been at our house. None of us have seen him. The proprietor says he has not seen him. The domestics have not seen him, and my belief is, that about twenty-eight persons, nearly all adults, have been missed in our house. I hear of several other houses in the same neighborhood where the inmates have no recollection of having seen the census-taker. If the same cardissness has prevailed in other parts of the city, it is possible that thousands of persons have not been enumerated.

—We have heard other instances of omissions to enumerate. We are personally cogni-

sions to enumerate. We are personally cogni-zant of five persons missed in three families, and from all we can hear, are led to the belief that the work of enumeration has not been very accurately or carefully performed. The deputies are required to ascertain the names, sex, ages, and nationalities of every one; the number of deaths, births, and marriages, within the past year. Also the actual cash value of

number of deaths, births, and marriages, with in the past year. Also the actual cash value of seach man's property, real and personal, placed under their proper headings.

There are many other questions, but these should be asked in every family. Our readers can judge from their own knowledge how far the deputies have compiled with their instructions. One fruitful cause of error has been, in taking the replies of servant girls, when the head of the family happened to be absent. In four cases out of five, incorrect answers will be given. The deputy should have returned when the master or lady of the house was at home, and procured his information from them. The deputies should have made it a point to visit boarding, houses and hotels at meal times when the inmates could be seen, and correct information obtained; but this has rot been done. They have taken such guesses as the proprietors could, or were disposed, to give. At the very best landlords and landladies can only tell the number of boarders; as to ages, nativities, etc, it would be mere guess work.

We are convinced that a large number of people have been left unenumerated, and that the other statistical information has been obtained in a very defective manner. Such as the value of real and personal property. Marshal Hoyse has doubtless given his deputies proper instructions, but we lear they have been carried out imperfectly. The reputation of the city requires that the census should be accurately ta, ken.

TAND AND OUR PROBLEM.

We have said again and again, that the contion of the Republican party on the slav-ery question is identical with that held by both political organizations prior to the adop-tion by the Democratic party of the dogmas of Calhoun. The history of our National conceded at the South as well as at the North stance in which the enunciation of a doctrine has met with more marked or more universal reprobation in Congress than that which gree ted Mr. Calhoun's theory of the Constitution It was condemned alike by the leaders of hot political parties. We have a letter from an indignant Republican at Jaliet, blowing up the Chicago and St.

Louis road for the refusal of its managers to reduce the fare to and from Springfield, to the State Mass Convention, to three dollars. The complaint is unnecessary; and no comparison can be instituted between the rates on that road and on the Illinois Central, for the reason that cars to any number above ten and the necessary engines have been chartered cars to any number above ten and the necessary engines have been chartered of the Central by a couple of gentlemen who have assumed the responsibility of paying \$5,000 to the company whether they get a passenger or not; and that they, not the road, have reduced the fare. If we are not mistaken, a like number of ears on the Chicago & St. Louis were offered them by Col. Mason as a rates not materially different; but for some reason known to themselves they accepted Mr. Arthur's proposition, and the Ceatral gets the job. The Chicago & St. Louis have reduced their rates on their regular trains one-half, and that is liberality that ought not to be complain-

The bloody villainies in Kanssto force-slavery into the Territory, the corruptions and frand which have been fastened upon the administration in the vain attempt to maintain Democratic ascendancy in the free States—these have all been done at party dictation, through the aid of party, and to accomplish party ends. Why visit condemnation and punishment upon the poor unfortunate inatirument, while the real criminal—the Democratic party—is suffered to go "unwhipt of justice?" The real culprit escaped when James K. Poix closed his career with a single term. The same was true when Franklin Pierce redired from public life in disgrace. Will the people of this country suffer this thing to happen again in 1860? Will they exhaust their indignation upon the poor irresponsible instrument, and give their suffages again to the guilty principal—the Democratic party—which, with a change of agents, would again march steadfartly forward in the same pathway of corruption and fraud to the accomplishment of the same and the provided of appreciating the fact that he has been the victim of party designs and party necessities—that any other party leader in the estimation of his country may exclude allowed them. Four years ago it A large and enthusiastic Mass Meeting of the Republicans of Kansas City, Mo., was the Republicans of Kansas City, Mo., was held a few days ago, in which straight-out Lincoln and Hamlin resolutions were passed. The meeting was addressed by Col. William Glipin of Independence, who, in a capital speech, demonstrated the necessity for a Republican triumph in Missouri and the nation. The attendance was very large and the enthusiasm was hardly safe for a man in this county to call himself's Republican; now they come out bold-ly by the hundred, and openly declare that they will not take off their armor until the country is gloriously redeemed. They are pressing the pro-slavery men at every point, and are making converts daily. I am aware that they have a large majority to overcome; but it is growing beautifully less. The pro-slavery men have for several days irrepressible. Thus the truth makes its way— thus free speech gains the ground which free been industriously spreading reports of cholers in town; and many hundreds have been kep

away. Don't this vile trick show that the rancals are scared. The court-house clique in this county would put to shame a den of theires; they would astonish them with new phases of depravity.

Judge Trumbull stopped over night with Mr.
Ward, about five miles from here, and was this moraing escorted into town by 40 mounted Wide Awakes. At the Shielby house he was received by two or three hundred citizens, and Dr. Martin welcomed him in a neat little speech, reminding him of the meager and dispirited crowd he addressed at this place in 1855. The Senator's reply was one of the most beamtiful and touching passages I have yet heard. Everybody was deeply affected; and when he closed they gave him three hearty cheers.

There was too much dust to form a procession, and the people assembled in the grove east of town without any cere mony. In 1856 Buchanan beat Fremont in Shelby county ten to one; the Republican mesting to day was twice as large as any held here this season, and county would put to shame a den of the

Do you want any better proof that Shelby is wheeling into line? The Douglas majority of nearly 900 in 1858 will this year be reduced to 400 or 500; and one more such effort will write even that out.

I shall give only a few brief aketches of Judge Trumbull's speech. The Dred Scott case, said he, is held by Democrats of both sections as finally atthing the question of the right of slaveholders to take their slaves with them into the Territories. Now, it settled no anch point. The Court merely decided that a negro, not being a citizen, had no right to sue in that Court, and then went on to say how it

negro, not being a citizen, had no right to supe in that Court, and then went on to say how it would have decided had the mass been properly presented. This way of rendering decisions is as if a man should go before a Justice of the Peace and attempt to sue on a claim of \$500, and the Justice should tell him that he had no and the Justice should tell him that he had no power to decide the case, and then go into a lengthy statement of how he would lesse da-sided if the case had come within his jurisdic-tion. [Laughter.] Would such a decision have any binding force? We Republicans titlak not: Mr. Douglas and his wing of the party think it

It was again at the discretion of Judge Hardy to delay the proceedings a reasonable time. He knew very well that the State's winesses were nigh by, and would soon be present. Nothing else but the favoritism of the Judge can explain an disgraceful a departure from duty. If the witnesses had obeyed the subposans to the letter, they would have got into court in time. They were commanded to be there at 11 o'clock. Before 10, Terry was acquitted. It seems to us, the State's witnesses were not in legal default until at least 11 o'clock. Judge Hardy was there to administer the law; but he seems to have winked at its evasion.

The next incident in the bloody catalogue transpired last Tuesday evening. James A. Gordon, from Orascent City, Jowa, recently the keeper of a gambling saleon in Denver, while intexicated in a bawdy house in this city, shot the bar-keeper, James O'Neil, from New York. O'Neil received four balls from a revolver, all taking effect in the leg and hip.—The leg was broken in ten places, but O'Neil survives and may recover.

\*\*EURDER OF AN UNOFFERDING NAN.\*\*

No attempt was made to arrest Gordon, the public feeling little interest in the affair, on account of the locality where it occurred. But on Friday at midnight, still under the influence of liquor, he was in the Louisiana saleon, on Blake street, when he selfred a peaceable and unarmed man named John Gasta, from Lockport, N. Y., but recoulty of Leavenworth, by the hair, knocked him down, and finally shot him. The ball entered the top of his need, passing through the brain, and the poor man died simust without a struggle.

Late on Saturday night, another party found Gordon as Fort Lupton—and old and well fortified adobe trading post, now occupied as a ranche,—on the Platte, twenty-five miles below Benver. He was accompanied by a number of his friends, and from the well known desperation of the clique, and their strong position, the pursuers did not deem it practice to attempt his capture. They surrounded the fort, however, and slood their ground, sending a measage back to Deaver for assistance. As soon as he arrived here, forty or fifty men on horses and in earringes started tor the scene of excitement. They were too late, however, for almost inrough the midst of the guards, and struck off upon the prairie. Several shots were fired after him, one of which was believed to take effect upon his person, and another

Whose insets are those that are getting for ! Those of the Doug las men, or those of the Bell men?

Here's the way they are conducting the campaign over about Richmond. The Whig puts the following questions concerning the irrepressible nigger to the Esquirer, and is classroom for an answer:

Is John C. Breckinridge a class of the Dougher of the polyment of the services a class of Does he not till his farm with white hirelings altegaher?

We just have a curiosity to know how many votes the Whig makes for Bell and Ererett by applying such texts on their behalf, —Senator Green of Missouri, in a speech sparkyville, alladed to Mr. H. V. Johnson is wise:

A BRECKINEIDER AND LANE PARTY IN MASSA-CRUSSETTS.—There was a meeting Wednesday at the Parker Hense of about a venty-five supporters of Breckinridge and Lane, at which pre-liminary measures were taken for the wranker iton of a party in the State upon the Breckinston of a party in the State upon the Breckinstridge and Lane platform. Dr. George B. Loring, of Salem, presided. We learn that they got up an entirely new programme, which includes the calling lof adelgate convention at Fateuill Hall for the nonlimition of electors and State officers, and a mass ratification meeting the succeeding evening, which looks like giving up the contest for the organization. This, however, is adopted as an alternative, to be employed in case the articedent proposition to dall another meeting of the State Committee, and to obtain thereby the control of the organization, does not succeed.

The meeting raised a committee of one from each Senatoria District for the purpose of canvassing the State and ascertaining the strength of the Breckinging element. Among other prominent Democrats present were Gen. Whitney and Gen. Batler.

ILLINGS.—On Friday last a worthless fellow at south Pass stole a quantity of goods from the store of Mr. Adam Buck, of that place. Mr. B.

technic invention, was discussed at considerable length, and no satisfactory conclusion was had.

Yesterday, however, we heard many accounts of the marvelous meteor. The following communication was handed us by a citizen who remains the second of the marvelous meteor. The following communication was handed us by a citizen who remains the second of the most part ten o'clock, while setting at my front door, in company with my wife and others, we observed, in a direction S. E. by S., a very large, luminous body, moving behind a stratum of black tolouds. In a second, almost, there burst on cur view one of the most beautiful and brilliant meteors that we (or, i think tolors) ever had the good fortune to behold. It resembled a very large serpent, with a ball of fire in its mouth, and two small balls of fire about the middle of the train. The outer edges of the train were of a most beautiful green color. The centre presented the appearance of a very bright rainbow, while the head resembled in brilliancy a ball discharged from the largest sized Roman candles. The length, apparently, was seven times the diameter of the moon; while peasing below Mars, it appeared to be about three times the diameter of the moon; while peasing below Mars, it appeared to be about three times the diameter of the moon; while peasing below Mars, it appeared to be about three times the diameter who as wit. Will they be so kind as to give their view of it?

Another gentleman says it resembled a great bar of iron, just from the furnace, while, hot and seintillating. Another says it was as big as a barrol, and seemed like a red hot cannon ball, with a trail of light. Another says it came faming through the air, seattering liminous spray, as a locomotive at full speed plows the snow from he track.

We will be pleased to print short communications from persons who observed his phenomenon, as it will doubless receive the attention of scientific men in a degree hardly inferior to the meteor which passed over New York a few days since.

The Louisville store of Mr. Adam Buck, of that place. Mr. B. pursued the villain, and coming in sight, began shooting at him, which brought the scamp to a stand-still, and he recovered his goods. But while Mr. B. was conducting the fellow to town for safe keeping, he broke away from him and could not be retaken... The house of Mr. Bowen Keith, living on the Bidge, nine miles north of Jonesboro, was destroyed by fire on Thursday last. All his crop of wheat, about 125 bushels, which had just been threashed the day before, was all destroyed... A sad accident occurred at Sparland on the arrival of the up train, at noon on Monday last. It had been the practice of children, on the arrival of trains, to mount a platform and ride till increased speed required them to jump off. On Monday two smaller children—Mary Jane Corrigan, aged 8 years, and a boy named M'Guir, aged 4, thought they too would have a ride. They did have one: the girl got off, but in attempting to take the the girl got off, but in attempting to take the little boy off, her clothes caught under the truck, and both the children were drawn under, truce, and boin the chitten were drawn under, the train passing over and crashing the legs of each in a terrible manner. They died between 4 and 5 P. M. of the same day... At the Demo-cratic meeting at M. comb, Ill., the other day, several fights occurred, and among others an affeny in which a man named Bussell, of Maaffray in which a man named Russell, of Ma-comb, was stabbed several times with a knife by Zeke Morgan, a desperate character from Burlington. Morgan is no jail awaiting his trial-It is thought Russell will recover... A son of Samuel Johnson, aged 12 or 14 years, acciden-tally shot himself at Young Americs, on Tues-day afternoon last. He was in company with other boys, amusing himself with a pistol, and at the time of the accident had the point against his breast, and it is supposed was fitting the cap. The contents enterted his breast near the

following account of it:

Was 1 r A Mersons —A few minutes after 10 o'clock last night we were passing the United States Hotel, between Green and Jeffersoft streets, the moon shining very bright at the time, when the southeastern shy was suddenly illuminated with an intense brilliancy. It was so vivid that it added to the brilliancy of the full moon's illumination, and for the space of several seconds, with variable effugence, lighted up the scene. We were 'under the lee' of all immense building, and had no opportunity of looking at the sky, but we deem it a daty to science to state our grave suspicion that we had a Southern meteor last night to countervail the prophetic effects of the one recently seen in the North.

It may be interesting to mention in this connection, that at half past three o'clock yeaterday morning, there was a distinct Aurora Borealis. There were lofty ray-like shafts of light, that like the spears of a calestial army, glittered in the North—a moment pale as silver, and then flushing with the luster of gold.

As we concluded this article, the following dispatch was received:

Centiliorum, Angust 3d, 1860.—Ens. Con: A brilliant meteor passed over this city in a North-westerfy direction, at ten o'clock last minute.

Reart, causing his death in about ten minutes.

San Accident.—On Monday afternoon last a little child of our esteemed fellow citizen, Joseph Crawford, Esq., aged between four and five years, while running to his father with a market basket, which he had playfully thrown overhis need, fell into a boiler fall of boiling water, that had just been taken from the stove, scalding his right arm and about half of his hody from his aboulder to his knee. He died on Tuesday morning.—Dixon Republican and Islagraph.

In the state of th A case has recently been investigated in Dablim by the Board of Commissioners, a tunatico inquirendo, in which a woman, who he he beirayed into a marriage for the purpose of securing her money, £18,000, to the Church of Rome. Originally of very humble birth, and then a servant girl in London, Mrs Watte, the woman in question, had won the affections of her master, and on his death was left in possession of £15,000 in the funds, and about £180 a year in house property. But one child, a daughter survived. The husband's relatives then pursued the widow with a worrying litigation; they were defeated, but these proceedings left fixed upon her mind an idea that at some period or other she would be murdered. peared and threatened to set his dogs on them and shoot them if they did not leave. The little fallows ran home as fast as they could, and on arriving at home, Mr. Knight's son was found to be erazed with terror. He fancied that the dogs were after him, and that he had been shot. His fright at last produced convulsions, which ended his life in a few days... A melancholy and fatal accident occurred at Anamoss on Thursday. A man named Littlefield was shooting at a mark with a rife, and as it rained he fired from within the house through the door.

The results of the results of the pricate who married this fired from within the house through the door. fired from within the house through the door. The last time he fired a son aged 12 years, came riage took place on a Sunday, in a public house, and without the knowledge of any of Mrs. Watter relatives, though the lived at a few yards' distance. The priest acknowledged that up from the basement and his head passed be-fore the rifle just as it was fired. The ball struck

watte's relatives, though they lived at a few yards distance. The priess acknowledged that him just at the lower edge of the ear, passed into the head and killed him instantly...A man named Daniel O'Donnell was arrested recently at West Point, one charge of horse stealing, and for want of bail, was committed for rrial...A little girl about two years old, a child of Traman Williams of Waverly, was killed on the day of marriage, the original of which the street on Friday last, by having its head crushed by being run over by a wagon wheel, and strange to say, no one saw the accident, or knew that it had occurred until the child was found in the road gasping its last.

HANDER OVER.—Mady of the farmers in this county have their wheat cut and in the "shock," and nearly all of them will be through harvesting and have their wheat stacked by the end of this week. The earth haver yielded so general and shandant a harvest in this section before, and the weather has been so favorable that the grain, plump and sound, will go into the grain, ywithout injury. It is stuly a golden harvest to our farmers.—Lyons Mirror. eas to £18,000, and it was went worth white energies to the forms of the church to secure such a prize as this.

The jury, by finding Mrs. Watte insane and that her insanity dates from June, 1857, unlify her marriage with Council, which did not take place until the September of that year. The plot then—for few will believe there was not a plot—has resulted in absolute loss to every one engaged in it. The jury very properly considering the peculiar character of Mrs. Watte's deliusion, strongly recommended that she should not be placed in a tinatic saylam. With equal propriety considering the swidence of the promovenis, they expressed strongly an opinion that she should not be committed to the care of her relatives. The Chancellor will be empowered to appoint proper persons to take care of Mrs. Watte's person and property. The daughter, who was baptized a Protestant, becomes a ward of court." The animal was unshod, yet Mr. Starin had his chis laid open, and his neck and aboulder severely bruised. He had a narrow escape from a very serious injury. As it is, he has received a severe hurt.... During a terrific storm at Whitewater last week, the barn of Mr. Lewis Vincent, about one mile west of the vil-

ter, who was baptized a Protestant, becomes a ward of court."

Sr. Taosas, W. L., July 2, 1889.

About a week ago a Commissioner of the Danish Royerment, who is possessed of five ylantations on the Island of St. Croix, left here on route for Washington, with a special mission to the United States Government. The object of this mission is to make a treaty with the United States Government a treaty with the United States executive power for the purpose of gesting a new stock of—(free or slave?)—laborers for the cane fields of St. Croix. The Commissioner is to propose to four Government a treaty by which the latter, in order to save a large portion of the expense which falls on the United States treasury by sending captured Africans to their homes, should take the shorter way of sending such Africans to St. Croix, where they would be taken in apprenticesting, a la Franciss.

This is, in short, what I was able to learn about the proposed treaty. How do you like the plan? If It were new and original, your New England and New York slavers might say that it was a good idea of a cunning head, and might base upon it a new plan of operations—if not so profitable as direct importation to Cuba, still worth considering—so as to smuggle slaves into St. Croix under the colors of the United States. Such a treaty would modultied it oppond quite a nice amount of money for its promotion; and, instead of about 500 slave weasels, you would have 1,000 leave your ports revery year, who would practice their traffic comparative security under the provisions of the proposed treaty. If even captured, they would easily find ways to gain the price for the apprendince;" and the whole sactivity of your navy in this respect would prove a big hambug.

I Notara.—The Indiana State Pair will be held at Indianapolis from October 15th to 20th. The new grounds are nearly completed, and ample preparations are making to reader it the finest industrial exhibition awar held in the State. — A note to the Boston Transcript informs the world of the whereabouts and present occupation of Miss Frechika Bremer. She left Jorganism in May, 1859, after a fall survey of the most interesting parts of Palestine, having lived in coursets, and seen much denied to less distinguished travelers. She understook the most adventurous excursions on horse-back into the interior, with a single Arab as had guide and servant, not fearing the wild Badouns of the dessert. She has examined the Holy Land from Mount Libanus to the Dead Sea; risted the memorable places; passed to Constantineple, Smyrain and the great places in the East; and then resched Athems to rest and write. She has arranged and copied her notes on Switzerland. Her travels in the East and write. She has arranged and copied her notes on Switzerland. Her travels in the East and then see two other works. She will spend this summer among the Greek Limeds, and return to rest one more Winter at Athean. She promises to give to the world a treaties on Frayer, which is already completed.

MARINE JOURNAL.

The continuance of another week's fine weather has greatly altered the face of the country, and proportionally improved the prospects of a corn harvest. As immense quantity of hay has been well carried, the yield being a fair average, but the quality this season, in some places, falls short. The blooming period in wheat has commenced favorably, and nover will those farms which have been well drained better prove the advantage of such an outlay. \*\*MINIOTON, August 5.—A dispatch from Sydney, Nova Scotia, says: The coast survey steemer Bibli, which went to Cape Chudleigh, Labrador, with a scientific corps to observe the solar eclipse of July 18th, arrived here on Friday for New York. It is understood that the corps into the weather, and their observations were favorable. By the arrival of Mr. Dimitry, Secretary of Legation of Costa Rica, information had been reseived of a full ratification to grant the railroad right to Ambrose Thompson, it having been approved by both houses of the Costa Rica Congress, July 4th. The grant is for eighty years, roadway to be 300 yards wide, alternate sections being given to the railway of a mile square. The remaining sections are to be retained by the Government. The posts at each end of the road to be protected throughout the torm.
